CENTRAL VALLEY REGION**

NOTICE OF PUBLIC HEARING

concerning

**AMENDMENT OF WASTE DISCHARGE REQUIREMENTS
(NPDES PERMIT NO. CA0079511)
FOR THE
CITY OF SHASTA LAKE
SHASTA LAKE WASTEWATER TREATMENT FACILITY
SHASTA COUNTY**

The City of Shasta Lake (Discharger) owns and operates the Shasta Lake Wastewater Treatment Facility (Facility) and discharges up to 1.3 million gallons per day (average dry weather flow) of treated wastewater into Churn Creek, a water of the United States. The treatment system consists of screening, oxidation, secondary clarification, cloth media filtration, and UV disinfection. The discharge of wastewater from the Facility is regulated under existing Waste Discharge Requirements (WDRs) Order R5-2014-0052 and National Pollutant Discharge Elimination System (NPDES) permit No. CA0079511.

The Discharger is currently making upgrades to the Facility to come into compliance with permit conditions and effluent limitations contained in Order R5-2014-0052. Upgrades to the Facility are partially complete; the UV disinfection system and cloth filters have been installed and are operational, but the remaining upgrades to the Facility are not completed. WDRs Order R5-2014-0052 does not correctly describe the UV disinfection system or cloth filters, nor does it contain UV operating specifications and monitoring. Therefore, Order R5-2014-0052 is being amended to include the UV disinfection system and cloth filters as part of the treatment process description as well as UV operating specifications and monitoring. Staff recommends the Central Valley Water Board adopt the tentative order to amend Order R5-2014-0052.

A public hearing concerning this matter will be held during the Central Valley Regional Water Quality Control Board meeting that is scheduled for:
